My dear Rector,

Your letter of April 16th regarding the acceptance of a grant from the Rockefeller Foundation for the cátedras of Physiology, Neuro-Physiology and Physio-Pathology has been received. I have transmitted the contents of this letter to our New York Office, and have just received a reply accepting the conditions which you outlined and agreeing to make the grant effective. I shall advise you as to when the period of collaboration shall begin.

May I say to you once more that the Rockefeller Foundation is very happy to collaborate in the development of your Medical School and feel sure that this joint project will fulfill the desires which all of us have towards helping the progress of medical education in Chile.

Sincerely yours,

Dr. J. H. Janney
